French Sport Solutions & Facilities

The aim is to bring together French companies offering products or solutions for the sports industry worldwide.

Few examples:

B to B for professionals (professional athletes, trainers, physical trainers, sports scientists, venue managers, emergency services, security forces & armies, local authorities & administrations, national & international federations, hospitality industry):

Turnkey solutions for sports competitions: Indoor/outdoor design of competition platforms for national and international events.

Turnkey solutions for sports training: indoor/outdoor design of training centers, sports centers, fitness centers, combat, wrestling and defense sports facilities, sports trails.

IT solutions for exploiting athlete data for sports performance (data collects) and commercial purposes (Fitness sale software).

B to C (mass market):

Turnkey solutions for sports training: Acquisition of physical preparation equipment.
Consumer goods: small sports equipment and consumables.

Company : SPORTCOM

Represented by : Jean-René SAVARY

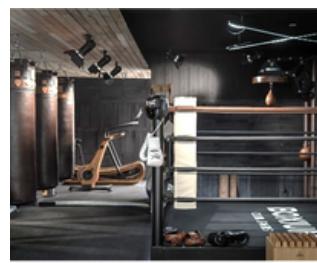

Website : www.sportcom.eu

Business overview :

SportCom has been a French manufacturer of combat sports and martial arts equipment for twenty years. Specializing in boxing rings, punching bag gantries and the fitting out of combat sports halls, this Nantes-based SME stands out for its image as an expert and specialist in combat sports. Thanks to its qualified technical team, which supports your projects from A to Z, SportCom can provide you with a premium, multi-purpose combat zone, complete with punching bags and boxing rings, tailored to your image.

The R&D team's involvement in the in-depth study of each project's needs is an added value for all our customers. Our mastery of the entire manufacturing process enables us to be very precise in customizing the various product features (colors, logo, dimensions...) to best meet the needs of our customers and their gyms. SportCom products are designed to meet the needs of the most demanding users, for whom the products can be customized to their specifications.

Company : LAROQ

Represented by : Robin SCANO

Website : www.laroq.com

LAROQ

PERFORMANCE & FITNESS

Business overview :

LAROQ is a French sports equipment manufacturer made for professionals.

Initially oriented toward high-level sports, the company gradually spread its activity towards the fitness sector. LAROQ now offers a large panel of sports machines and accessories that range from physical preparation to performance to cardio training and fitness.

Every equipment has been developed in close collaboration with biomechanical specialists, athletes and recognized physical trainers. LAROQ machines are thus conceived to meet the needs of the most demanding users.

From the conception to the prototyping to welding, including the paintwork, assembly and upholstery, the overall production takes place on-site in the French region of Provence. This mastery of the entire manufacturing process allows us to go very far in the customization of various characteristics of the machines. This includes close attention to the upholstery, the frame colours or even the logos of the equipment.

Company : STRAMATEL

Represented by : Patrice ROUL

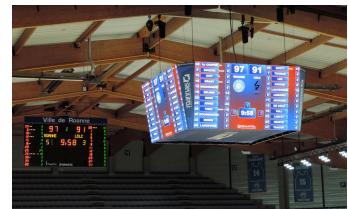

Website : www.stramatel.fr

STRAMATEL
AFFICHAGE ÉLECTRONIQUE & SOLUTIONS VIDÉO

Business overview :

- **Founded in 1981, Stramatel has become a key reference in the field of electronic sports display systems. For over 40 years, Stramatel products have been manufactured using cutting-edge materials: next-generation LEDs, ultra-sensitive sensors, radio-controlled consoles... These control consoles are at the heart of our expertise—they transmit all match data directly to our scoreboards. The company has managed to retain its family values while implementing a design, production, and service process focused on quality and environmental respect.**
- **We work across all sports to support clubs, local authorities, and municipalities in developing their sports infrastructure: gymnasiums, arenas, stadiums, swimming pools, ice rinks, and dojos.**
- **As the European leader in electronic sports display systems, Stramatel's equipment is present in over 90 countries and is installed in some of the world's largest sports facilities. The company relies on its adaptability and innovation to best meet user demands.**
- **Our activity also extends to video technology and event management. As experts in this field, we offer products related to this expertise: LED video cubes, perimeter LED displays, connected scoring tables, video screens, and dynamic LED systems. All these video installations are managed with our custom-designed video production software. This diversification meets the growing demand for dynamic and interactive display solutions from professional clubs and sports federations.**
- **It is worth noting that we are certified by FIBA (International Basketball Federation) and recommended by the FFBB (French Basketball Federation).**
- **Stramatel also serves industrial companies with LED safety displays. These products address the CSR needs of industrial groups and take the form of accident-free day counters. This versatility demonstrates Stramatel's ability to adapt to various markets while maintaining its excellence in electronic display systems.**

Turnover : 8 M€
Export Turnover : 2 M€
staff : 50 people

Export Zones : 90 pays

Projects & Achievements :

- **Stramatel supports and equips top clubs in professional basketball championships (Betclic Elite & Pro B), handball (Starligue and Proligue), football (Ligue 1 and Ligue 2), and volleyball (Marmara Spike League): Paris Basketball, FC Nantes, Le Mans Basket, AS Monaco Basket, HBC Nantes, Paris Volley.**
- **Installation of our equipment for the Paris 2024 Olympic Games: Adidas Arena (scoreboards, LED video cubes, LED video ribbons, perimeter displays, video control systems), Olympic Aquatic Center (swimming timing systems, touchpads, false start panels), Stade Yves du Manoir (video screen), Stade de la Beaujoire (LED perimeter video displays).**
- **Electronic display equipment for special event matches at the Accor Arena, Paris La Défense Arena, and the Philippe Chatrier Court at Roland-Garros.**
- **Stramatel equips major arenas in France: Adidas Arena, Arena du Futuroscope, Arena de Reims, Tremblay Arena, Colisée de Chartres, LDLC Arena, Palais des Sports de Lyon, and more.**
- **Expertise in timing systems with LED timers at the Dakar Rally for over 19 years, and swimming timing systems featuring complete setups (touchpads, false start panels, timing triggers, video screens, consoles).**
- **Stramatel also operates internationally, supplying equipment for major sports competitions: European Handball Championship in Poland 2023, Futsal World Cup in Uzbekistan 2024, Jeux de la Francophonie 2023 in Kinshasa, Women's EuroBasket 2023 in Slovenia, EuroLeague Final Four 2023 in Lithuania, Super Basketball League in Taiwan, Volleyball World Championship 2022 in Poland and Slovenia, Handball World Championships 2021 (Egypt), 2023 (Poland), and 2025 (Croatia), as well as EuroBasket 2013 in Slovenia.**

Business overview :

Gregori International is a family business, specialized in the realization of tailor-made, turnkey, "fast-track" projects, in any climate and sometimes in extreme climatic conditions, in the fields of sports surfaces and infrastructures and the environment and landscape.

Founded in 1971 by Jean-Louis Gregori and managed since 2005 by Xavier Gregori, Gregori International has more than 50 years of experience. Present internationally since 1980, with references on 6 continents, it is a multicultural and civic company that draws its strength from its highly qualified teams and its perfect mastery of logistics for optimal responsiveness.

With more than 250 references in more than 50 countries and 7 permanent offices around the world, Gregori International is a company resolutely focused on export.

Company : ECLATEC**Represented by : Frédéric MINCK & Sébastien DUMONT****Website : www.eclatecinternational.com/sport-areas/****Business overview :**

Eclatec is a French designer & manufacturer of lighting solutions for sports activities and their surroundings. We create lighting solutions to illuminate sports fields and facilities to provide comfortable experiences for players and visitors.

Proper sports lighting will enhance the spectator experience and improve the athletes' performance quality. The selection criteria include light intensity – to allow athletes to perform at their best, as well as uniformity and light direction to avoid glare and interference.

Our 100% French expertise covers both the design, R&D, and production of floodlights, high masts (masts, battens, platform, etc.), as well as the lighting control management system.

Our customers: FFF, FFR, FFT, developers of urban sports spaces (multi-sports fields, skateparks, outdoor fitness, petanque, swimming pools, etc.), and indoor spaces (basketball, handball, futsal, paddle, etc.).

Company : SMC2

Represented by : Samuel GUILLEMARD

Website : www.smc2-construction.com

Business overview :

SMC2 is an international company headquartered in France, near Lyon. It relies on a network of subsidiaries in Canada, Germany and the United Kingdom, as well as a representative in the Netherlands, to support projects in France and internationally.

Specialising in the design and construction of sports and leisure facilities, SMC2 develops sustainable, high-performance and attractive equipment, designed to encourage the enjoyment of sport, play and social interaction throughout the year.

Sports halls, gymnasiums, covered playgrounds, grandstands, digital services, sports and play equipment lockers, and play architecture projects: each development is conceived as a living space, accessible to all audiences.

Play architecture plays a central role in SMC2's approach. Through innovative playful structures integrated into their surroundings, the company designs spaces that stimulate imagination, encourage movement and foster social interaction, for both children and adults.

SMC2 also integrates digital solutions at the heart of its projects to enhance user experience and support operators in the management and animation of facilities. Monitoring tools, interactive systems and connected solutions help make spaces smarter, more adaptable and aligned with new uses.

Committed to a responsible approach, SMC2 carefully combines various materials, notably wood, steel and textile membranes, with respect for and preservation of the planet. This approach makes it possible to design sustainable buildings that are resource-efficient and offer strong functional value, serving local communities and their inhabitants.
